FOR IMMEDIATE RELEASE

EXPERTS TO TALK ON HIGHLY CONTROVERSIAL ISSUES

The moral, legal, and medical questions involved in using prison inmates for psychiatric experimentation have recently attracted wide attention and have led to both professional and public disagreement as to whether or not the inmate population should be available for such experiments. There is also considerable question among members of the medical profession regarding the use of some of these methods on patients generally. The medical, legal, and human aspects of these practices will be discussed by a group of distinguished experts on:
