TO THE PEOPLE OF PRAIRIE FIRE
TO THE BROTHERS AND SISTERS OF THE WEATHER UNDERGROUND
TO ALL OUR THIRD WORLD AND ANTI-IMPERIALIST ALLIES

We are a society of Native American Warriors. We believe that the duty of a revolutionary is to make revolution. In this way we send our love and respect to those of you who have decided that the imperialist must be stopped and freedom must be gained. Because of the press of this duty and because of our immediate need to protect our people we will not be able to talk to you in person. We hope that one day we can, as we feel the need for all the revolutionary forces to band together before the final, inevitable victory.

The liberation of the whole of Vietnam was to us a great victory for the Native American liberation forces as well as our Vietnamese sisters and brothers. Our hearts sang for them and our courage and determination was strengthened by the Vietnamese hard won freedom. We learned from this victory that the U.S.A. can and will be defeated. The great white father of our nightmares has been mortally wounded and is now skulking in his lair waiting the final blows that are now poised above his head. It may be at its most dangerous point right now, attempting to crush the hurt within its belly but now is the time for the long series of death dealing blows to begin. This is one of the reasons for our decision to act now. We realize full well that this decision, this step is final and irrevocable. It has been made. Once made, we have begun to feel peaceful and at home with ourselves. Our objectives are clear now. Our deliberations concrete, not abstract. Our major concern is for the next victory and how to follow it with another. Nothing is more precious to us than independence and freedom and to have at long last begun our march toward it is rewarding in itself. We urge this decision on everyone of our allies.

Our decision is also a reaction to the tremendous military oppression that exists on our homeland. Our people are being murdered in cold blood, raped and degraded in their own homes. Just as in other lands, we are being viewed as less than human and fair game for any sick agent of the U.S. government. So our decision is partially made by the enemy itself. What other course is left to us? To do less that fight to the very death would prove the enemies view of us.

Our homeland is under attack, our comrades are dying in the field. We are taking to the field to never stop. Join with us, my comrades. Bend every effort to liberate our home areas. Give us support morally and logistically. Together we can stop them monster and by dealing these blows from within we can aid and maybe save people around our Mother Earth.
